

Ambient temperature probe with Pt1000 sensor, 200-80/M

code: SN243M

Temperature probe with Pt1000 sensor.

Fast accurate air probe -30 to +80°C for direct insertion to the logger connector. Tolerance $t = \pm(0.10 + 0.0017 \cdot |t|)$ in accordance with EN 60751. Response time: $t_{63} < 10s$, $t_{95} < 30s$ (air flow 1m/s).

Pt1000 probe with connector MiniDIN.

The probe is supplied with a calibration certificate.

The probe is interchangeable without calibration to a specific device and regardless of the length of the cable.

Probe is not resistant against moisture.
